Applicable Directives:

2004/108/EC – Electromagnetic Compatibility (EMC) Directive

The EMC Directive 2004/108/EC sets the essential protection requirements for electrical and electronic equipment. The EMC Directive limits electromagnetic emissions of equipment in order to ensure that, when used as intended, such equipment does not disturb radio and telecommunication as well as other equipment. The Directive also governs the immunity of such equipment to interference and seeks to ensure that this equipment is not disturbed by radio emissions when used as intended.

Applicable Standards:

EN 55022:2010 – Information technology equipment – Immunity characteristics – Limits and methods of measurement.

EN 55024:2010 – Information technology equipment – Immunity characteristics – Limits and methods of measurement.

EN 610003-2:2006/A1/A2 – Electromagnetic compatibility (EMC) – Part 3-2: Limits – Limits for harmonic current emissions (equipment input current ≤ 16 A per phase).

EN 610003-3:2013 – Electromagnetic compatibility (EMC) – Part 3-3: Limits – Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems, for equipment with rated current ≤ 16 A per phase and not subject to conditional connection.
